**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 January 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This action is in response to applicant's amendments submitted 31 January 2007.

#### ***Claim Objections***

1. Claim 33 is objected to because of the following informalities: in line 2, after "sufficiently" the word "long" or some synonym thereof is missing. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18, 22-24, 26,28-32, 34-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson (US 5,649,912).

Peterson teaches an injector filling assembly comprising a cartridge housing (60), with a first end seal (66) and a second end stopper (62), an adapter (70) with thread (74), a post (72), and cap (73); and resilient retainers (21). Fig 4C: the post is too short to fully load the injector (30) and therefore the injector must be filled by vacuum/suction applied by withdrawing the plunger (32). As to claim 28 the term "substantial" is vague and encompasses any amount of medicament.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson in view of Reinhard (US 5,788,670).

Peterson does not disclose the use of a two-chamber cartridge. Reinhard discloses a two-chamber cartridge with a lyophilized medicament and a bypass channel. Fig 1. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a two-chamber cartridge in order to provide a lyophilized medicament to the patient.

5. Claims 25, 27, and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson.

The amount of fluid the post of Peterson is capable of dispensing from the cartridge is dependent on the length of the cartridge/distance of the rear stopper from the end of the cartridge. In the case of a partially filled cartridge or a very long cartridge or a very thick stopper, the post would be capable of dispensing only a small amount of liquid, or only purging air from the cartridge. Therefore Peterson is considered capable of meeting the limitations of claims 25, 27, and 33.

***Allowable Subject Matter***

6. Claims 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest a needless injector with a power pack assembly, in combination with the other limitations of the claims.

***Response to Arguments***

8. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
